

ULRICH BERGMANN

SENIOR DATA SCIENTIST / ECONOMIST

// CONTACT

// ABOUT

Senior Data Scientist with a proven track record in deploying impactful machine learning models, leading data science teams, and mentoring analytics engineers. Specializes in causal inference, especially regression analysis, with strong analytical and communication skills honed through extensive industry practice and academic research, including a publication in a top-tier economics journal.

// EXPERIENCE

Since Sept 2023
Berlin, DE

SENIOR DATA SCIENTIST / ECONOMIST
Bolt

- Developed and successfully released an ensemble machine learning model, improving multi-month prediction accuracy of average realized sales prices by 43% compared to domain expert predictions.
- Identified potential savings of up to 80% in incentive costs through causal inference analysis of two-sided market pricing and incentive data.

July 2022 - Sept 2023
Berlin, DE

LEAD DATA SCIENTIST
Tourlane

- Led a team of two data scientists, managing company-wide data science initiatives. Owned yearly strategy and monthly roadmaps.
- Designed and supervised the creation of a live machine learning pre-sales prioritization model, reducing sales costs by 15% company-wide.
- Owned the company-wide A/B testing framework. Established multiple concurrent A/B tests using causal inference techniques, decreasing test runtime by 75% through more efficient statistical methods and unified treatment groups.
- Designed and supervised the creation of a multi-touch marketing attribution model.
- Initiated and drove the establishment of an ML Ops platform, reducing deployment time of new data science models from one month to a few days, saving one FTE in maintenance, and cutting yearly compute costs by 60%. Successfully negotiated a 70% reduction in the yearly price from the initial offer.
- Developed and conducted technical interviews for 3 data science and 4 analytics engineering positions.

July 2021 - June 2022
Berlin, DE

DATA SCIENTIST
Tourlane

- Developed and deployed a live customer segmentation machine learning model, increasing company revenue by €500,000 and profits by €40,000 during the A/B test; the model remains in production.
- Enhanced detection of repeat customers by 25%.
- Optimized code to reduce data warehouse runtime by 50% and cut the main table's runtime from 20 minutes to 90 seconds.
- Interviewed new colleagues and mentored data analysts on coding best practices, version control, and statistical methodologies.

// EDUCATION

2015 - 2021
Zurich, CH

PHD ECONOMICS
University of Zurich
Supervisor: [🔗](#) Ernst Fehr

2019 - 2020
New York, NY, USA

VISITING RESEARCHER
Columbia University
[🔗](#) Cognition and Decision Lab

2012 - 2014
Bonn, DE

MSC ECONOMICS
University of Bonn

2007 - 2012
Bayreuth, DE

BA PHILOSOPHY & ECONOMICS
University of Bayreuth
